## **DETAILED ACTION**

### ***Election/Restriction***

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-6, drawn to chimeric parainfluenza virus comprising backbone bovine parainfluenza, classified in class 424, subclass 186.1. (1st product)
- II. Claims 7-11, drawn to recombinant DNA or RNA encoding chimeric parainfluenza virus, classified in class 424, subclass 211.1. (2nd product)
- III. Claims 12-16, drawn to a vaccine formulation, classified in class 424, subclass 813. (3rd product)

The inventions are distinct, each from the other because of the following reasons:

Inventions of Groups I-III are mutually exclusive and patentably distinct products each are structurally and functionally different products which are made by different methods and have different uses. The examination of all groups would require different searches in the U.S. Patent Shoes and scientific literature and would require the consideration of different patentability issues.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

Art Unit: 1648

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a petition under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
